

Freight Forwarding

Always going in the right direction with the correct overview

For the international transport of goods, the proper export and import documents are required to get the goods smoothly across the border, and to prevent to pay too much import duties. With 3PL Dynamics software, you can manage the entire process. From beginning to end. Enter data only once and the software simplifies and accelerates work processes, saving you time and providing you better insight.

Our Freight Forwarding software is the ultimate software solution for handling road freight, air freight, sea freight, and customs activities. Simply administrate the procurement and sale of transport services. From planning down to collecting your money. Whether we're talking about a single transport order or a set of groupage requests; you always have insight into your performance levels.

Import & export: all in one solution

Handle all your road-, ocean- and air freight processes with one solution. From a request for quote to shipments, bookings and order processing. The corresponding documentation is generated by the software.

Groupage

Register separate bookings per destination and link them to a container file as split consignments. The software bears in mind the total weight and format of the split consignments. Making it a quick and easy assignment for you to compile loading lists and a container manifest.

Ocean freight

Book complete containers (Full Container Load) or consolidated containers (Less than Container Load) for your customers. Simply register the details necessary for the export consignment, and subsequently quickly generate a booking confirmation, transport request, customs request, customs clearance document or Transit declaration, a CMR waybill or a shipment instruction.

Air freight

Print with export consignments the House Air Way Bill and the Master Air Way Bill or sent it as an email. Links with customs systems for import and export can be quickly facilitated.

Automate customs declaration

The forwarding of goods demands expertise and a single system that supports all customs flows. That is why we offer comprehensive customs functionality within our software. Automate declarations and corresponding documentation directly from the application. While you retain continuous insight into the customs process.

Register relevant data

Capture the necessary data in our sea freight expedition software for the handling of containers, pallets, cars or packages:

- Product information (size, weight, hazardous substances, temperature, etc.)
- Details client & receiver
- Loading and unloading address
- Airline, shipping company & ship
- (air)ports
- ETD and ETA
- Bill of lading
- Retrieval-/delivery documents for containers
- CMR for container
- Invoices
- Customs declarations
- Assignments & confirmations
- Shipments certificates, Value statement, EUR.1 certificate, Certificate of Origin (CO) and ATR

Process purchase invoices automatically

Handle your logistics and financial activities from one single solution. Match for example incoming invoices to the agreements made earlier on in the logistics process, helping to keep errors to a minimum and thus increasing your margin. If you prefer, this process can be entirely automated using our Document Capture module that digitally saves all your documents, and purchase invoices are automatically created and matched.

Based on the knowledge and experience of other logistics service providers that are trying to reinvent the wheel on their own, we have partnered with a reputable Dutch company Boltrics to bring to market, their standard 3PL Dynamics solutions offerings for the logistics industry. As a modern, internationally operating and certified ERP and CRM partner, we can help you simplify, automate and streamline your internal processes, easily guide you through the implementation of appropriate products to be applied to the latest trends in modern application technology, and help you with digital transformation and cloud-based solutions. For 30 years, we have been helping to improve our customers' business results in the Czech and Slovak Republics, as well as with customers in many countries in Europe, South Africa and the USA.
